

Cystides et cuticules

**Marcel Lecomte,
Massembre 2019**

De belles cystides

Macrocystide chez *Pluteus cinereofuscus*

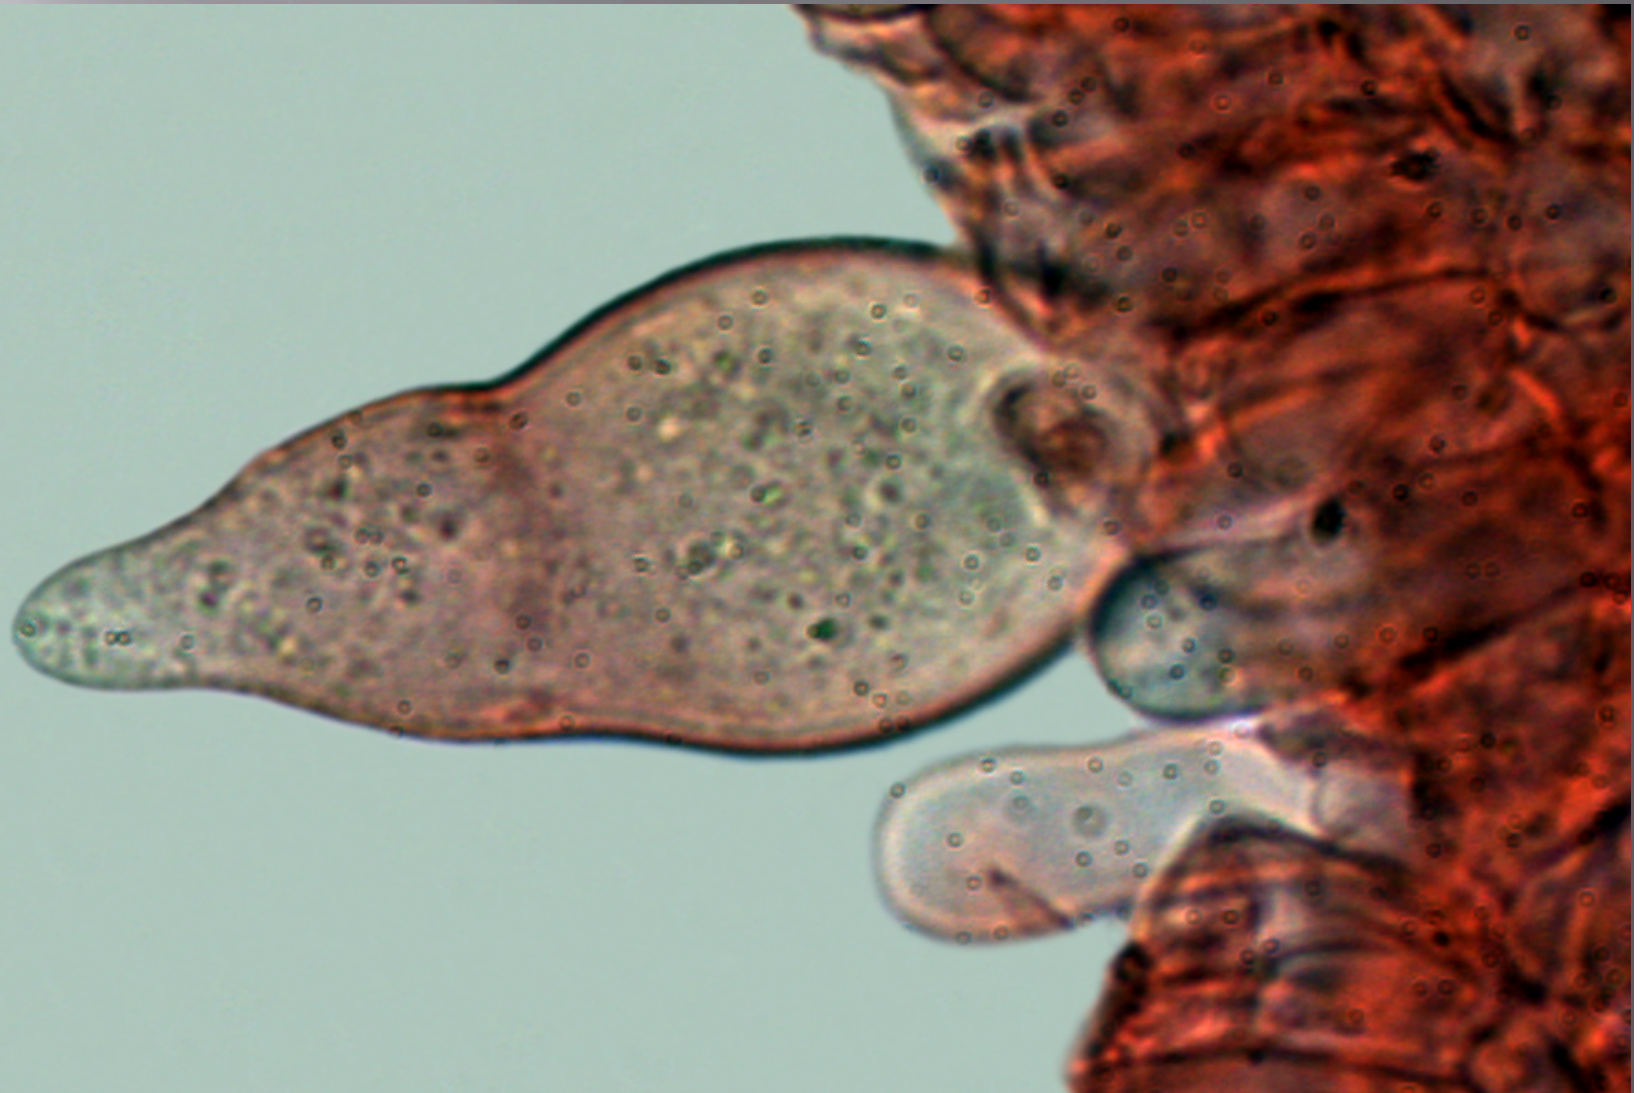

Macrocystide acuminée chez *Strobilurus esculentus*

F. Draye, 2013 - ©

Macrocystide mucronée chez *Russula trachyspora*

Photo C. Kaufholtz

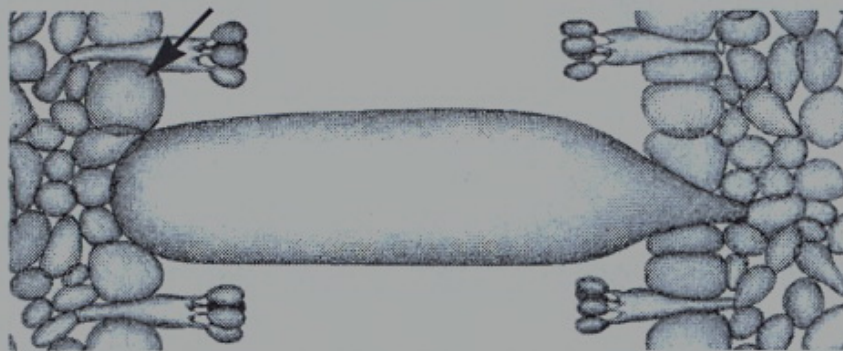

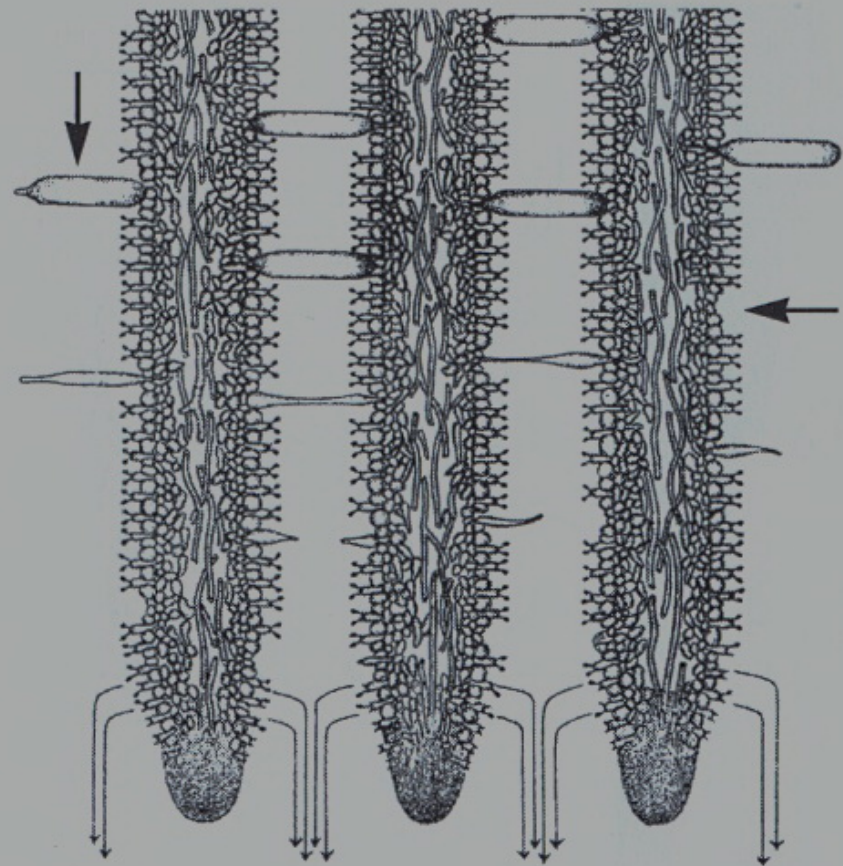

Macrocystide chez *Agrocybe acericola*

Macrocytides chez *Agrocybe arvalis*

F. Draye, 2013 - ©

**Les coprins et
les cystides
trabéculaires**

Coprinus atramentarius

**Schéma de G.H.
Clémenton**

Les cuticules

Revêtement filamenteux
couché régulier

Revêtement filamenteux
couché emmêlé

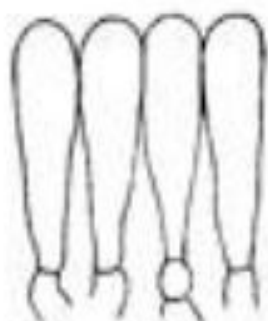

Revêtement filamenteux
couché entrecroisé

Revêtement entériforme

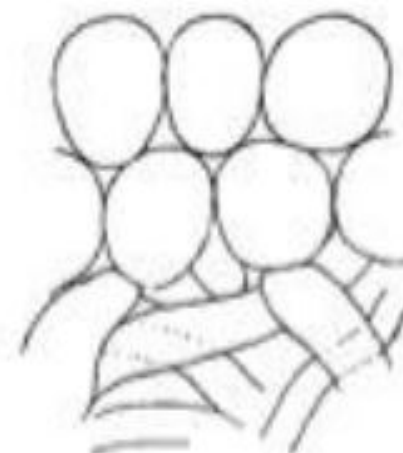

Revêtement filamenteux
dressé

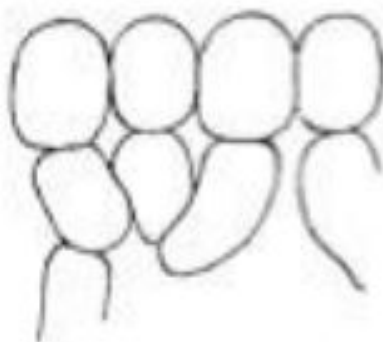

Revêtements hyméniformes

Revêtement
isodiamétrique

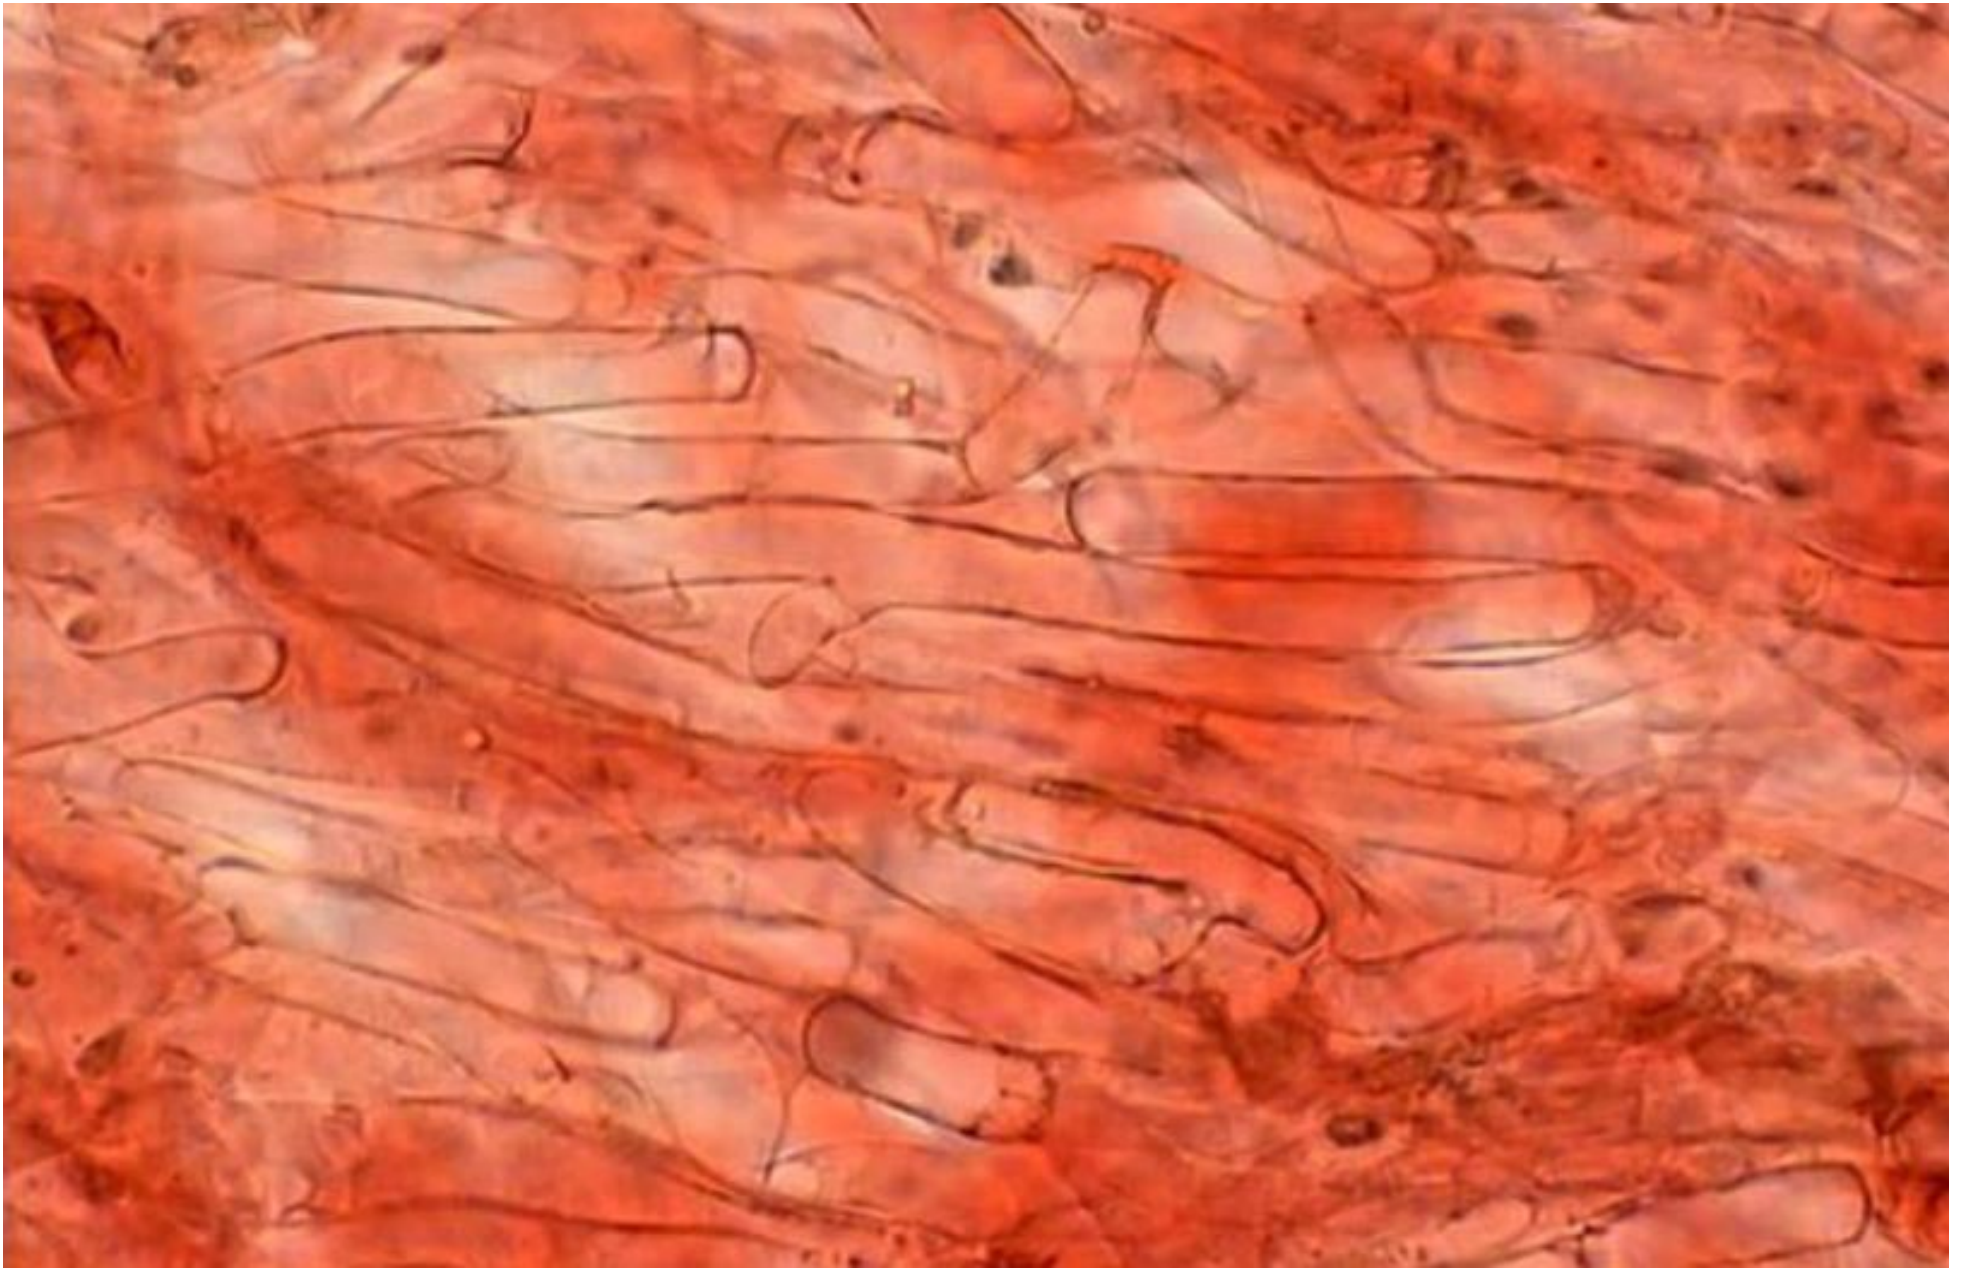

Revêtement pseudo-
parenchymatique

Revêtement
celluleux

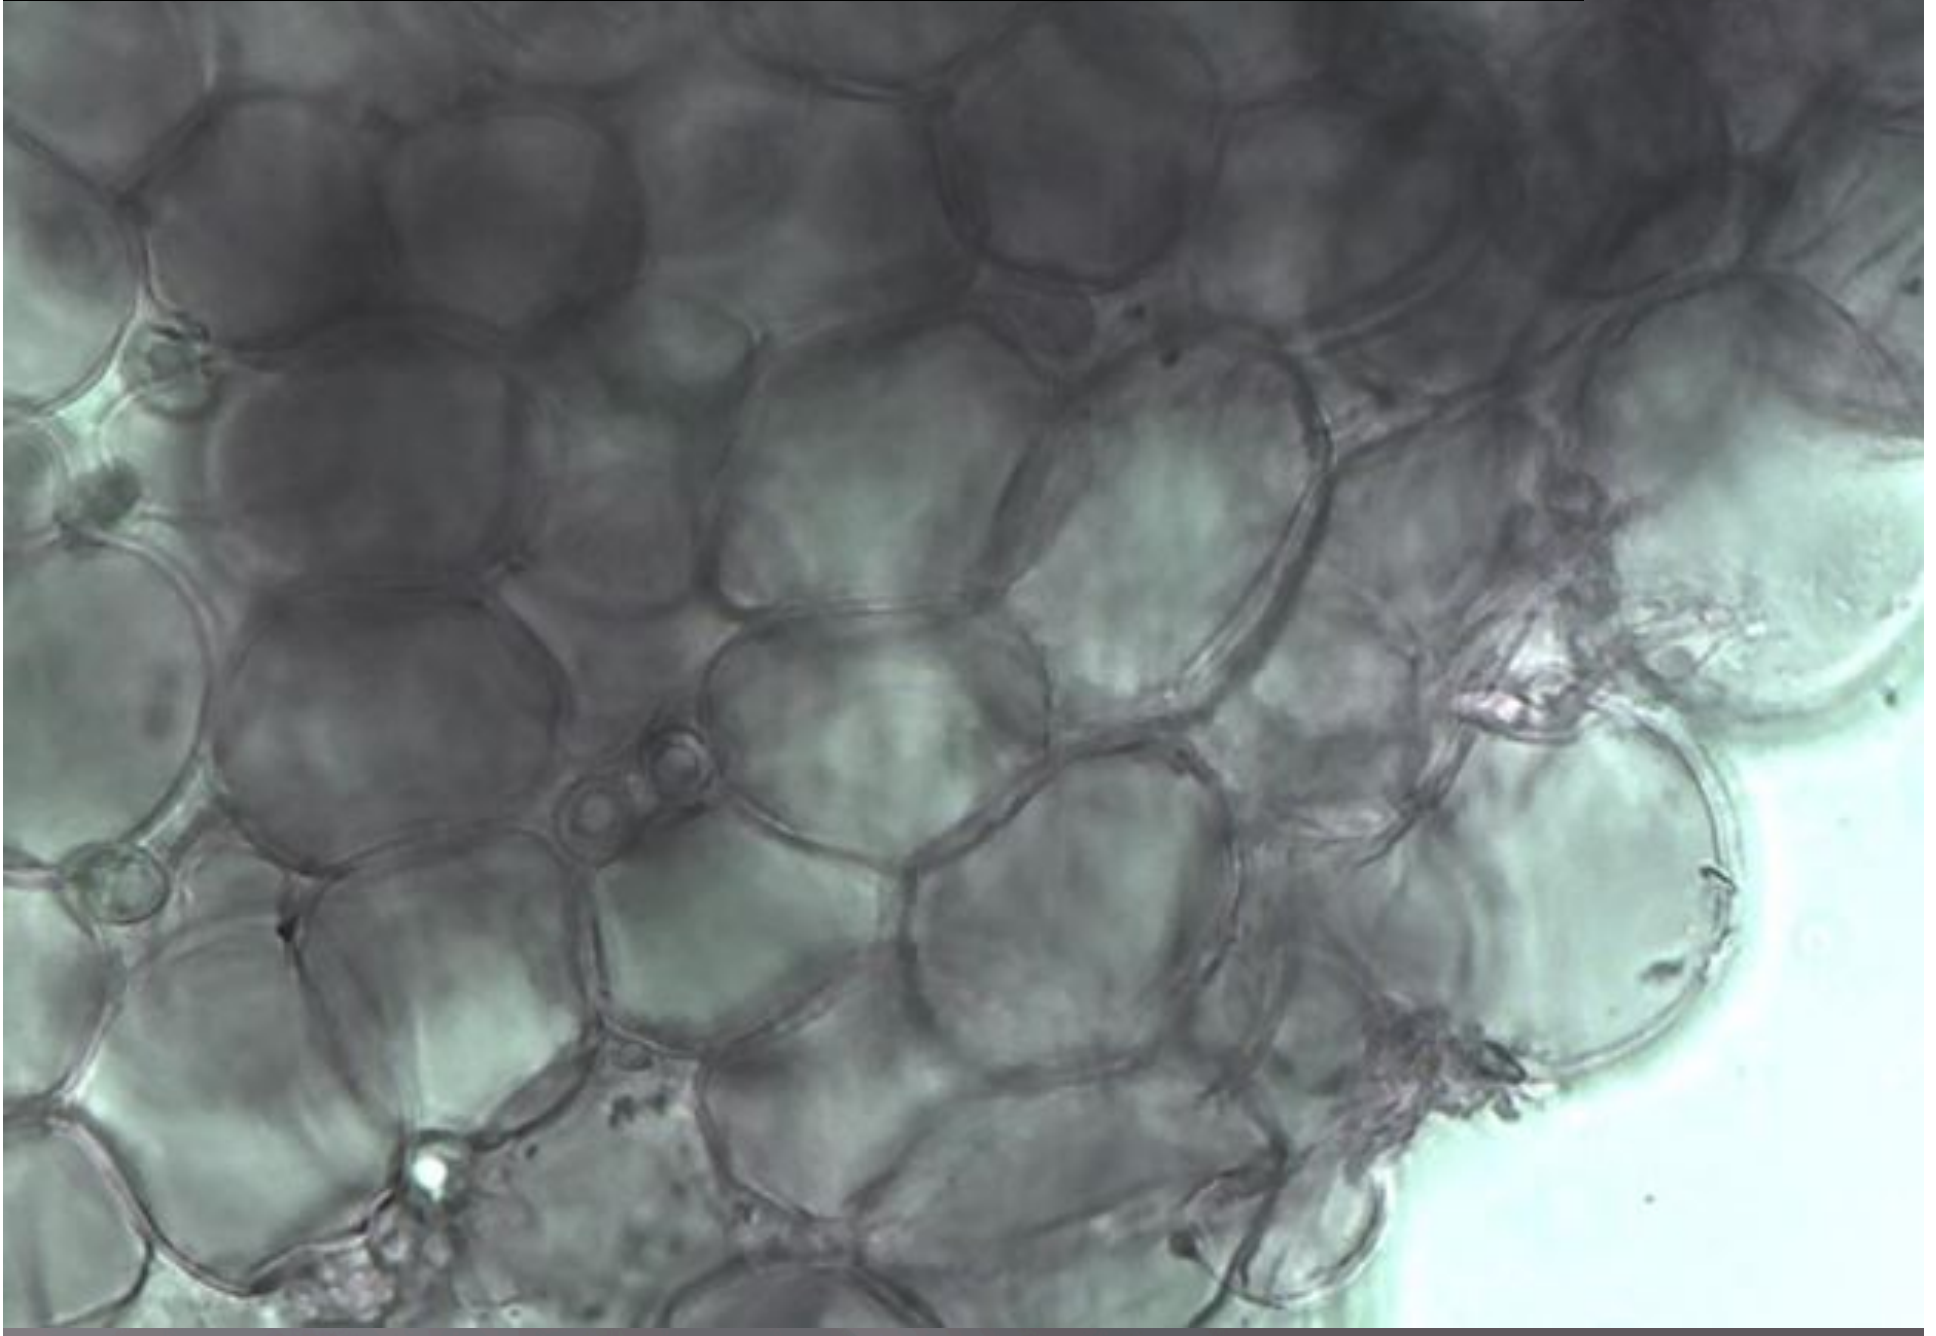

Transition entre hyméniforme
et celluleux

Cuticule filamenteuse (banale) chez *Omphalina galericolor*

Cuticule cellulodermique chez *Pluteus nanus*

Cuticule cellulodermique chez *Amanita muscaria*

Photo M.
Lecomte -

©

Cuticule
cellulodermique chez
Coprinus disseminatus

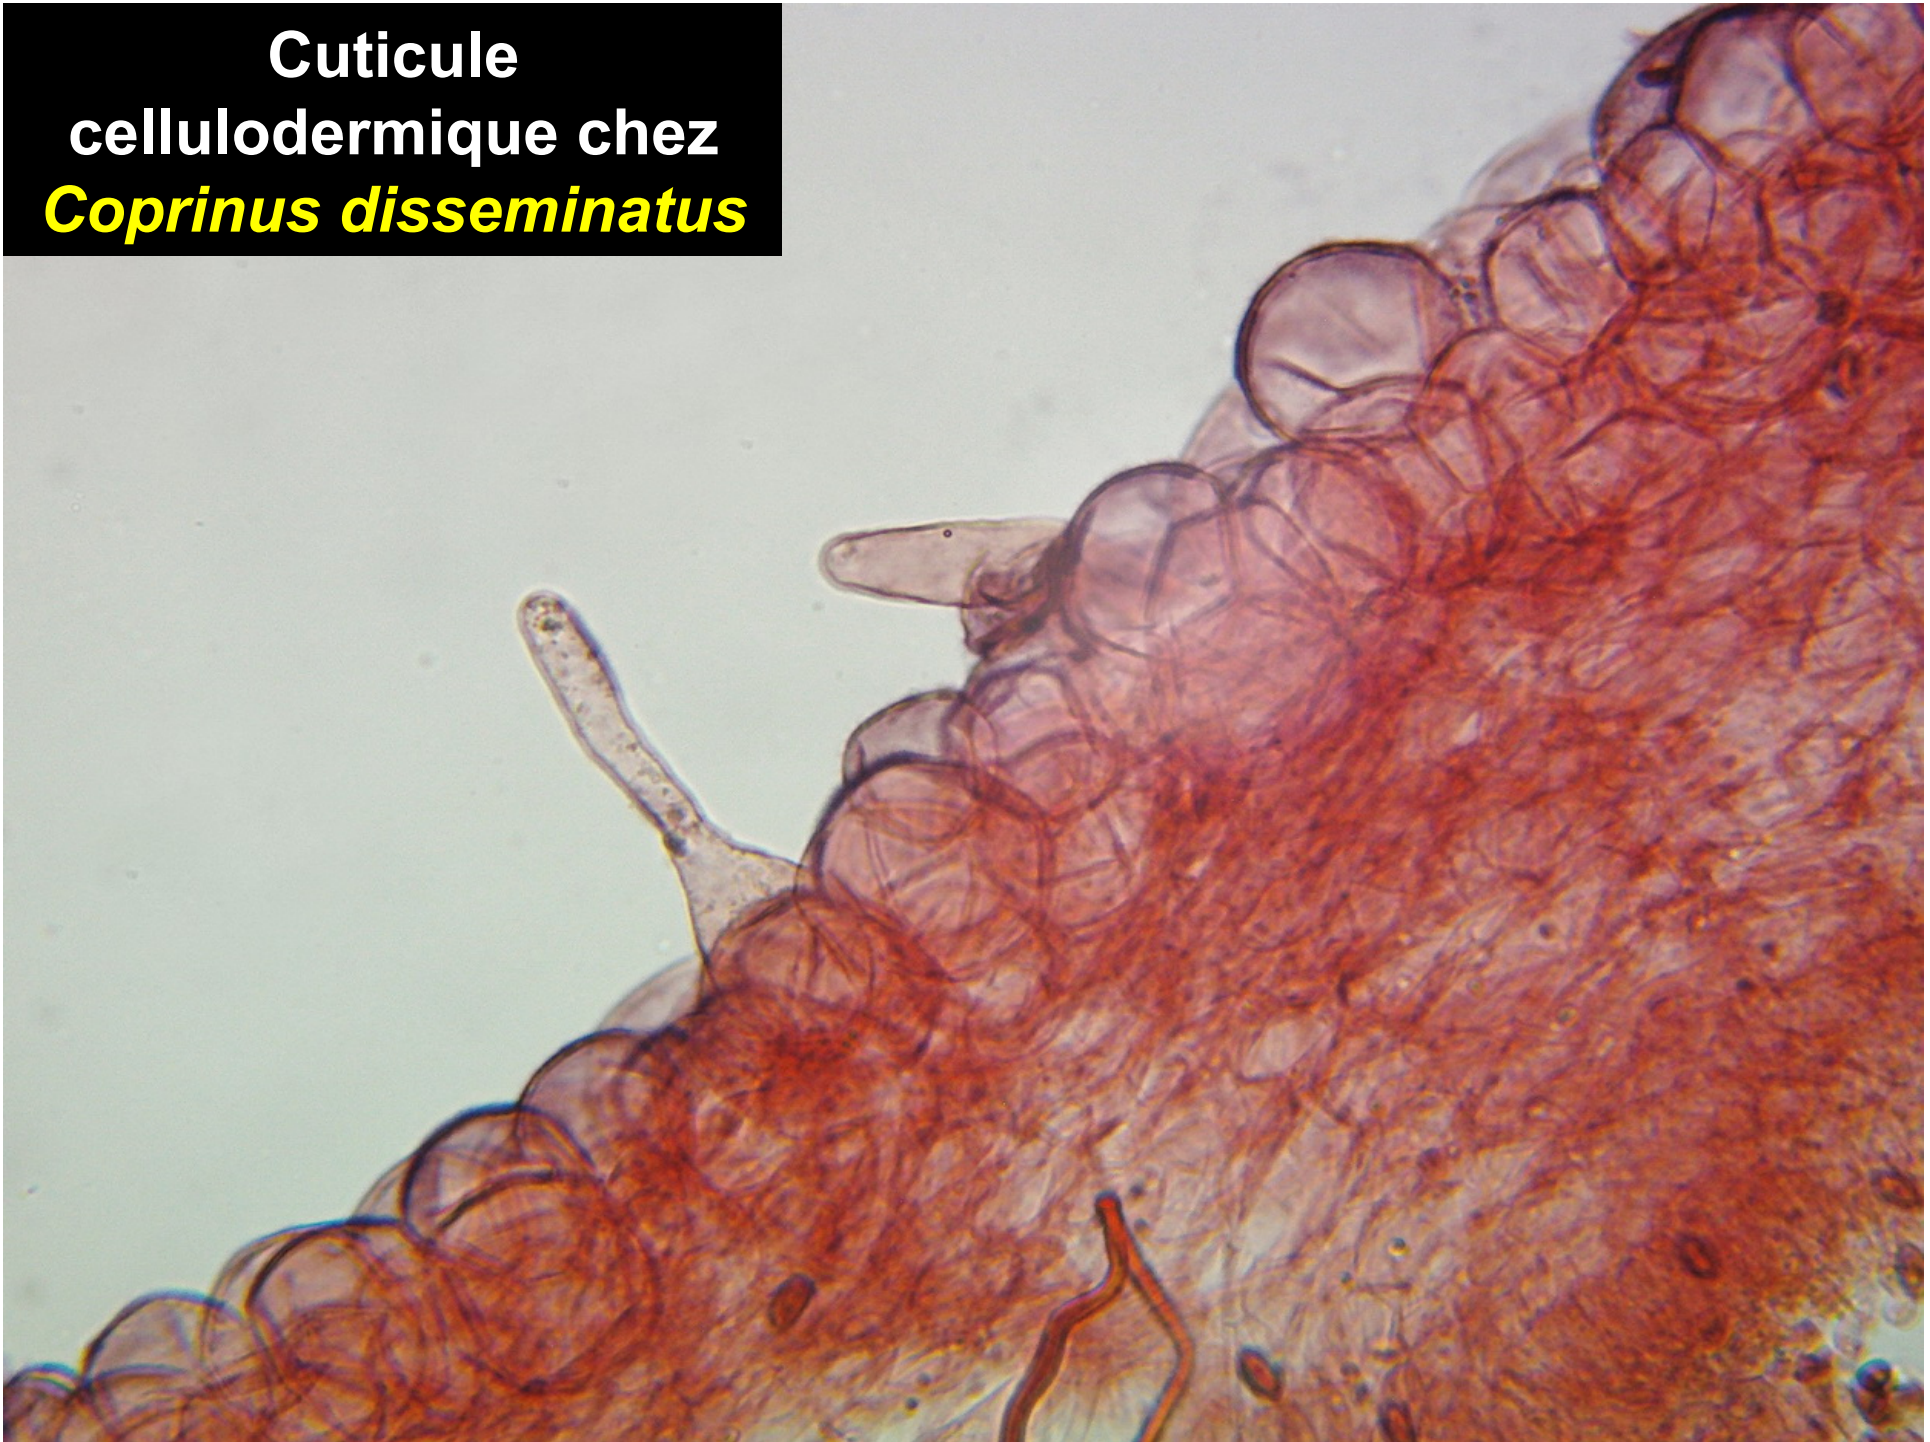

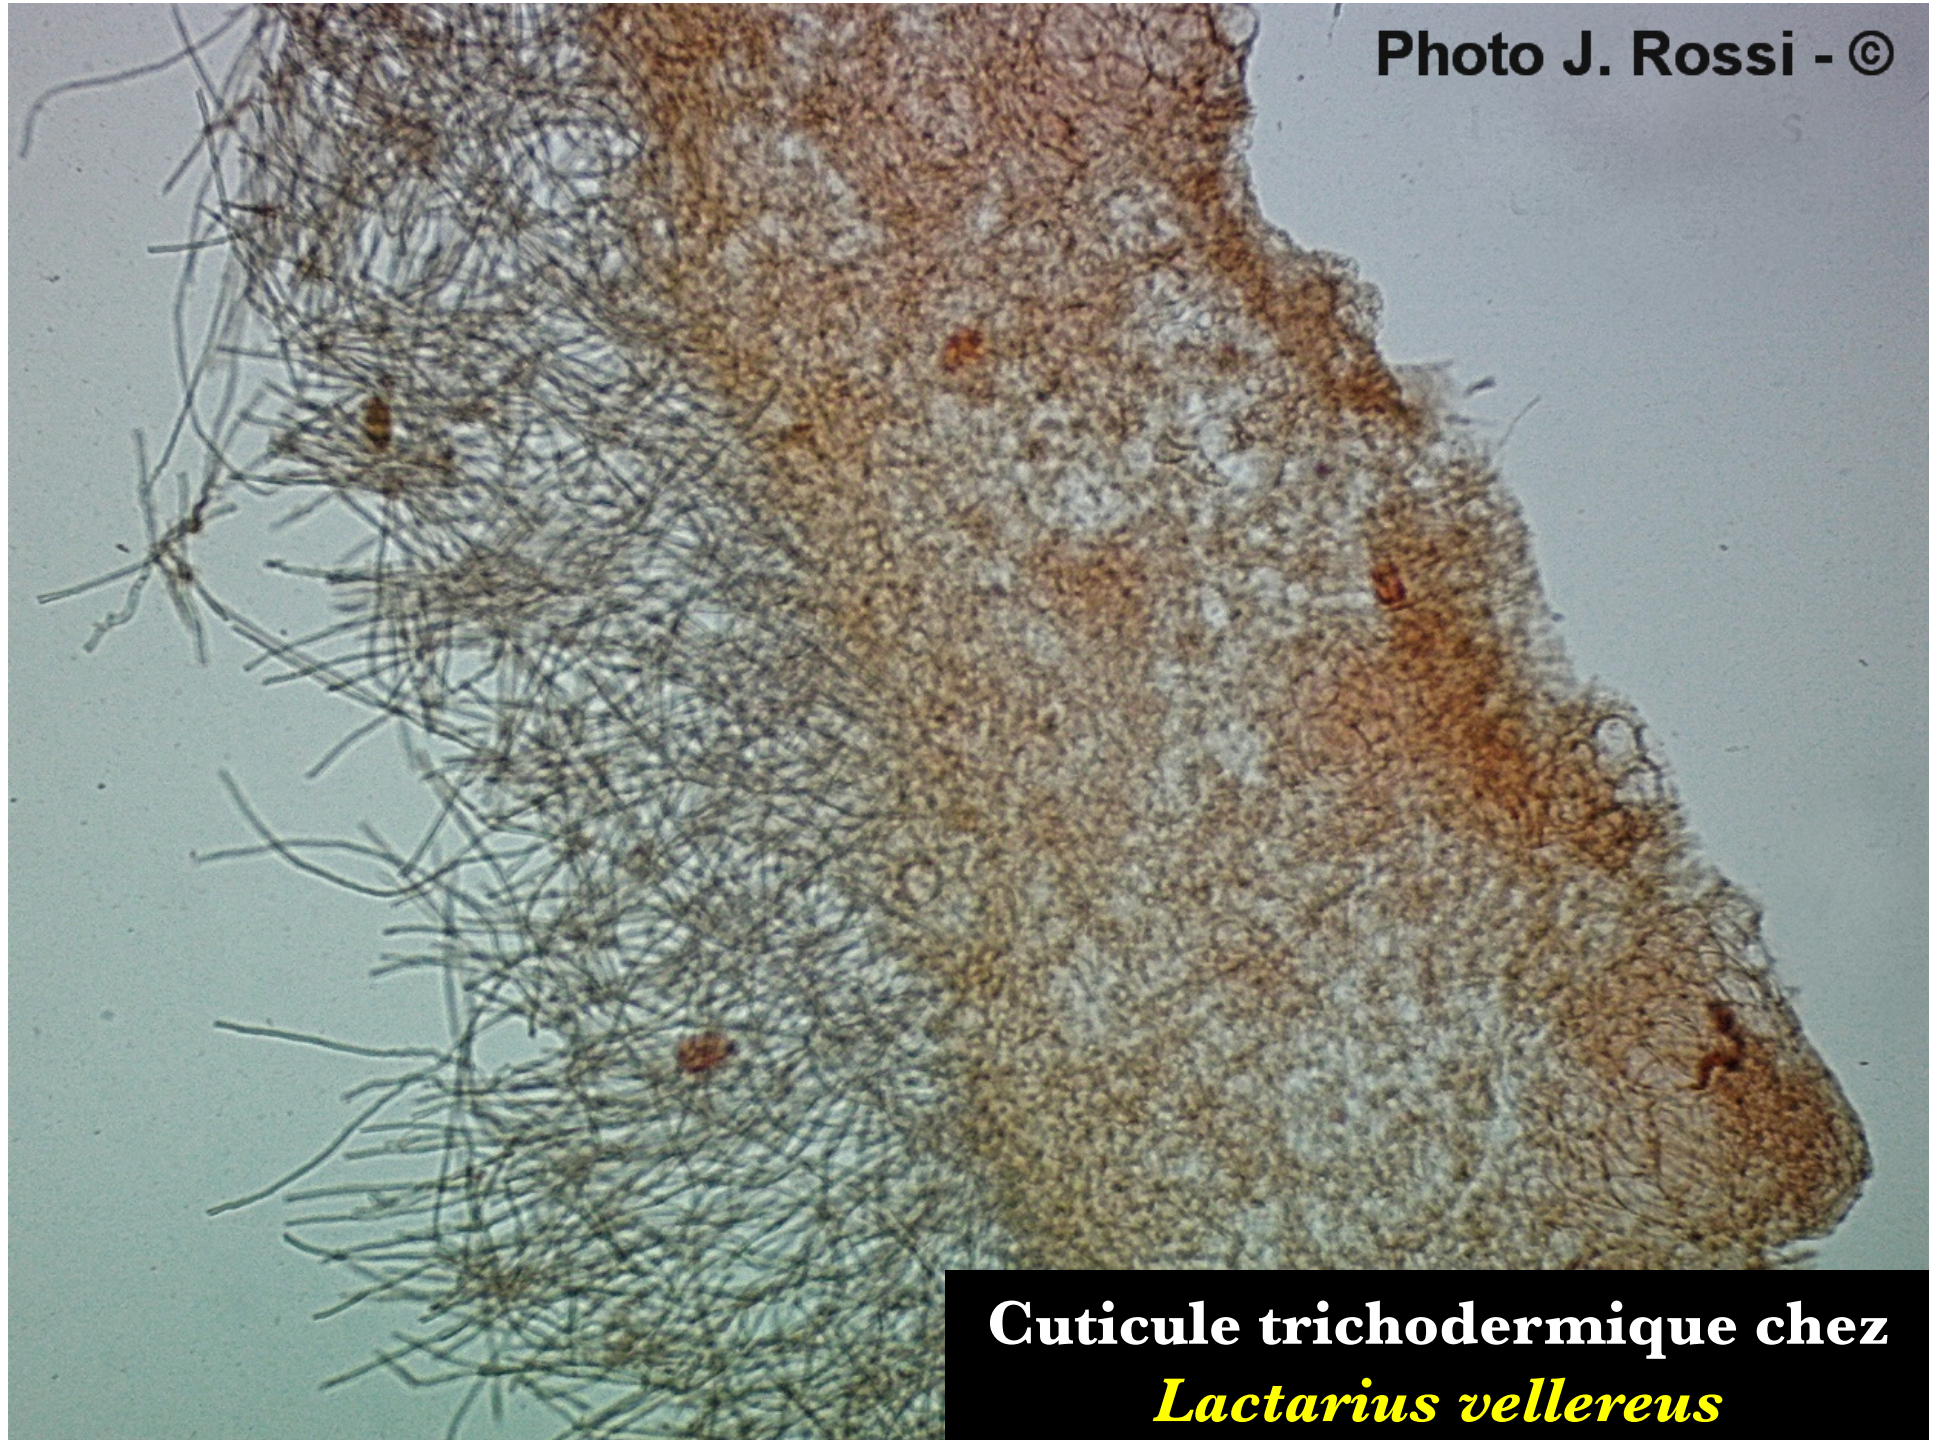

Photo J. Rossi - ©

Cuticule trichodermique chez
Lactarius vellereus

Cuticule trichodermique chez *Auricularia auricula-judae*

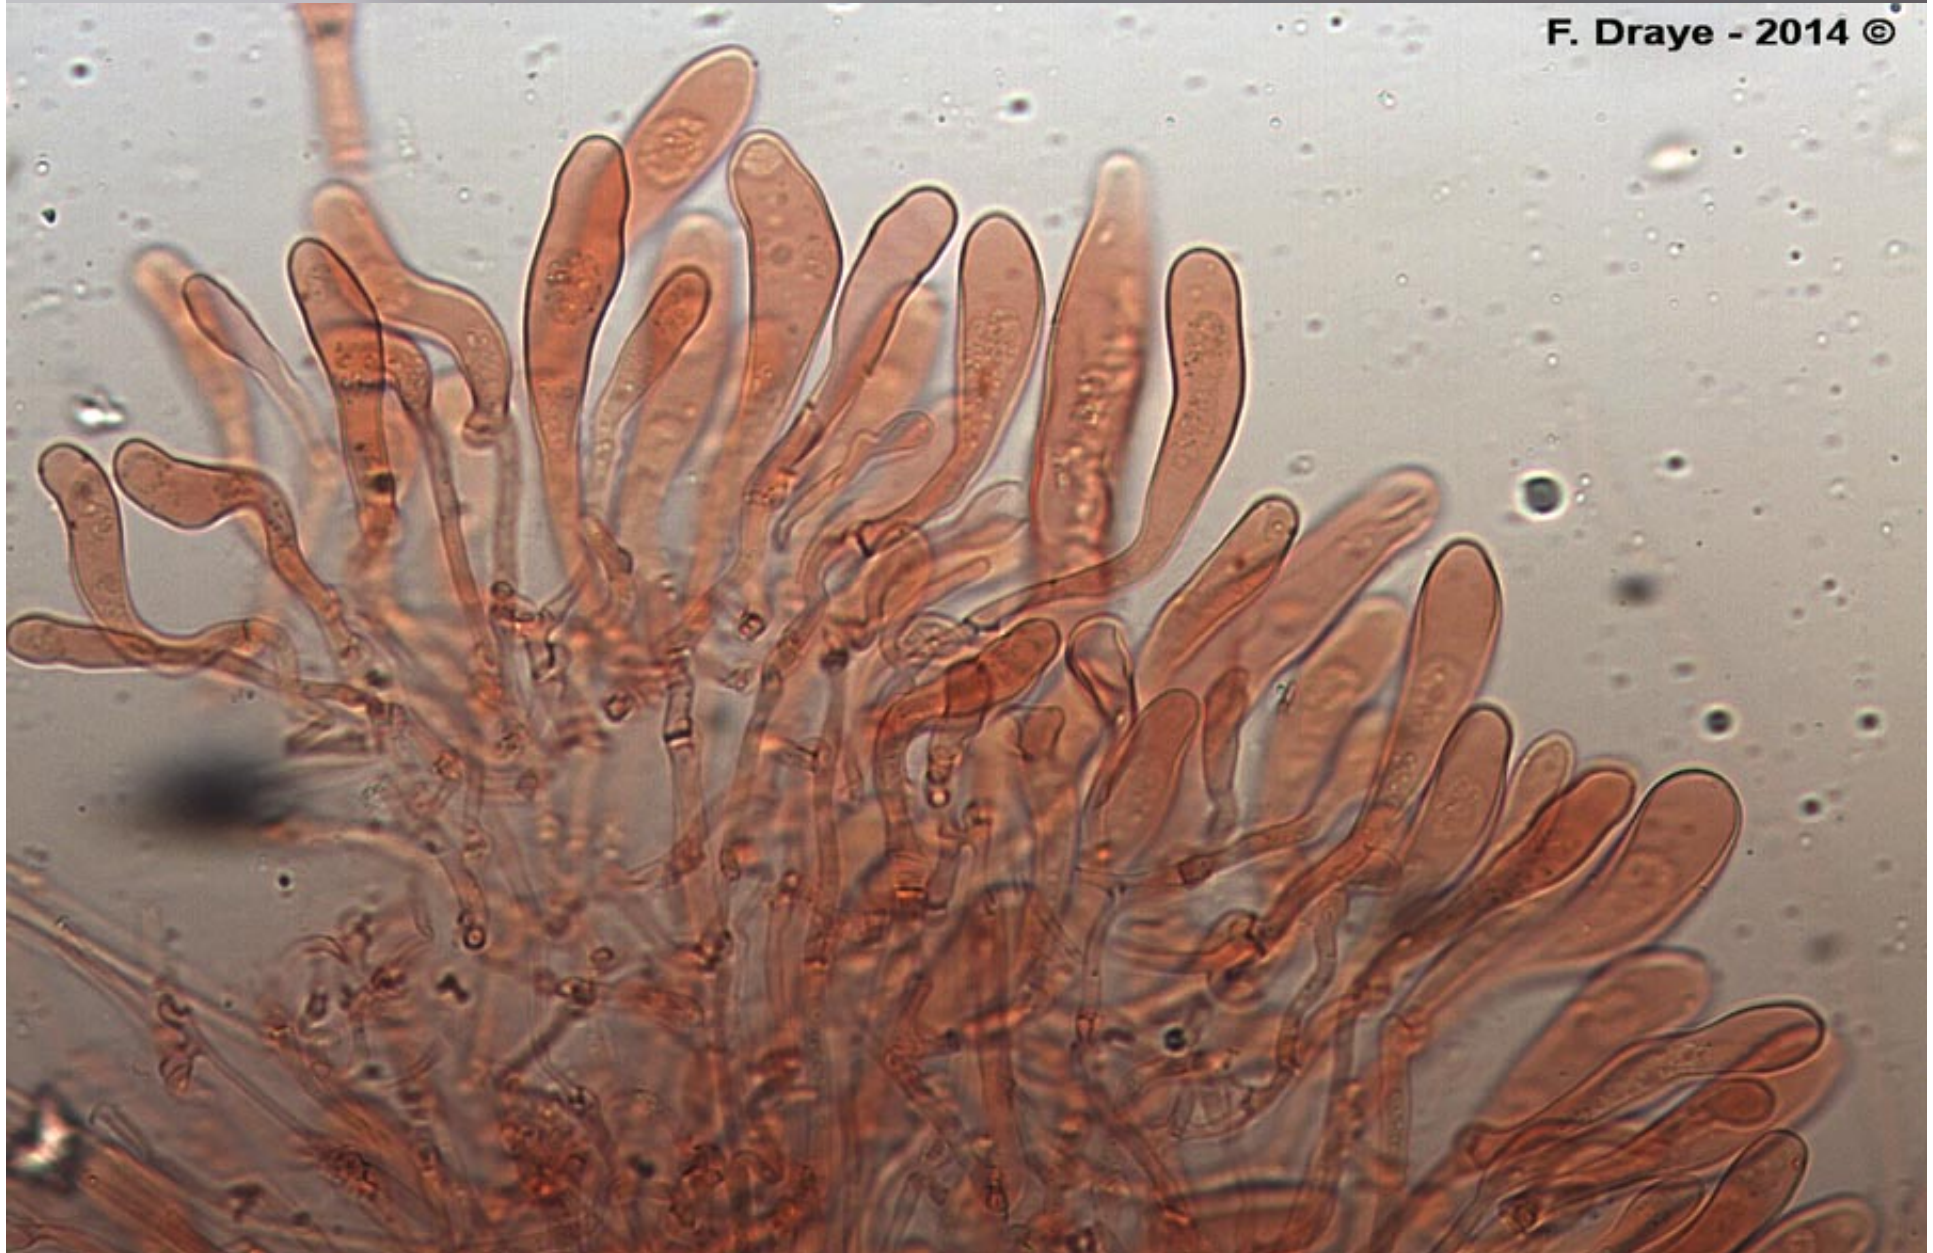

Face externe finement veloutée

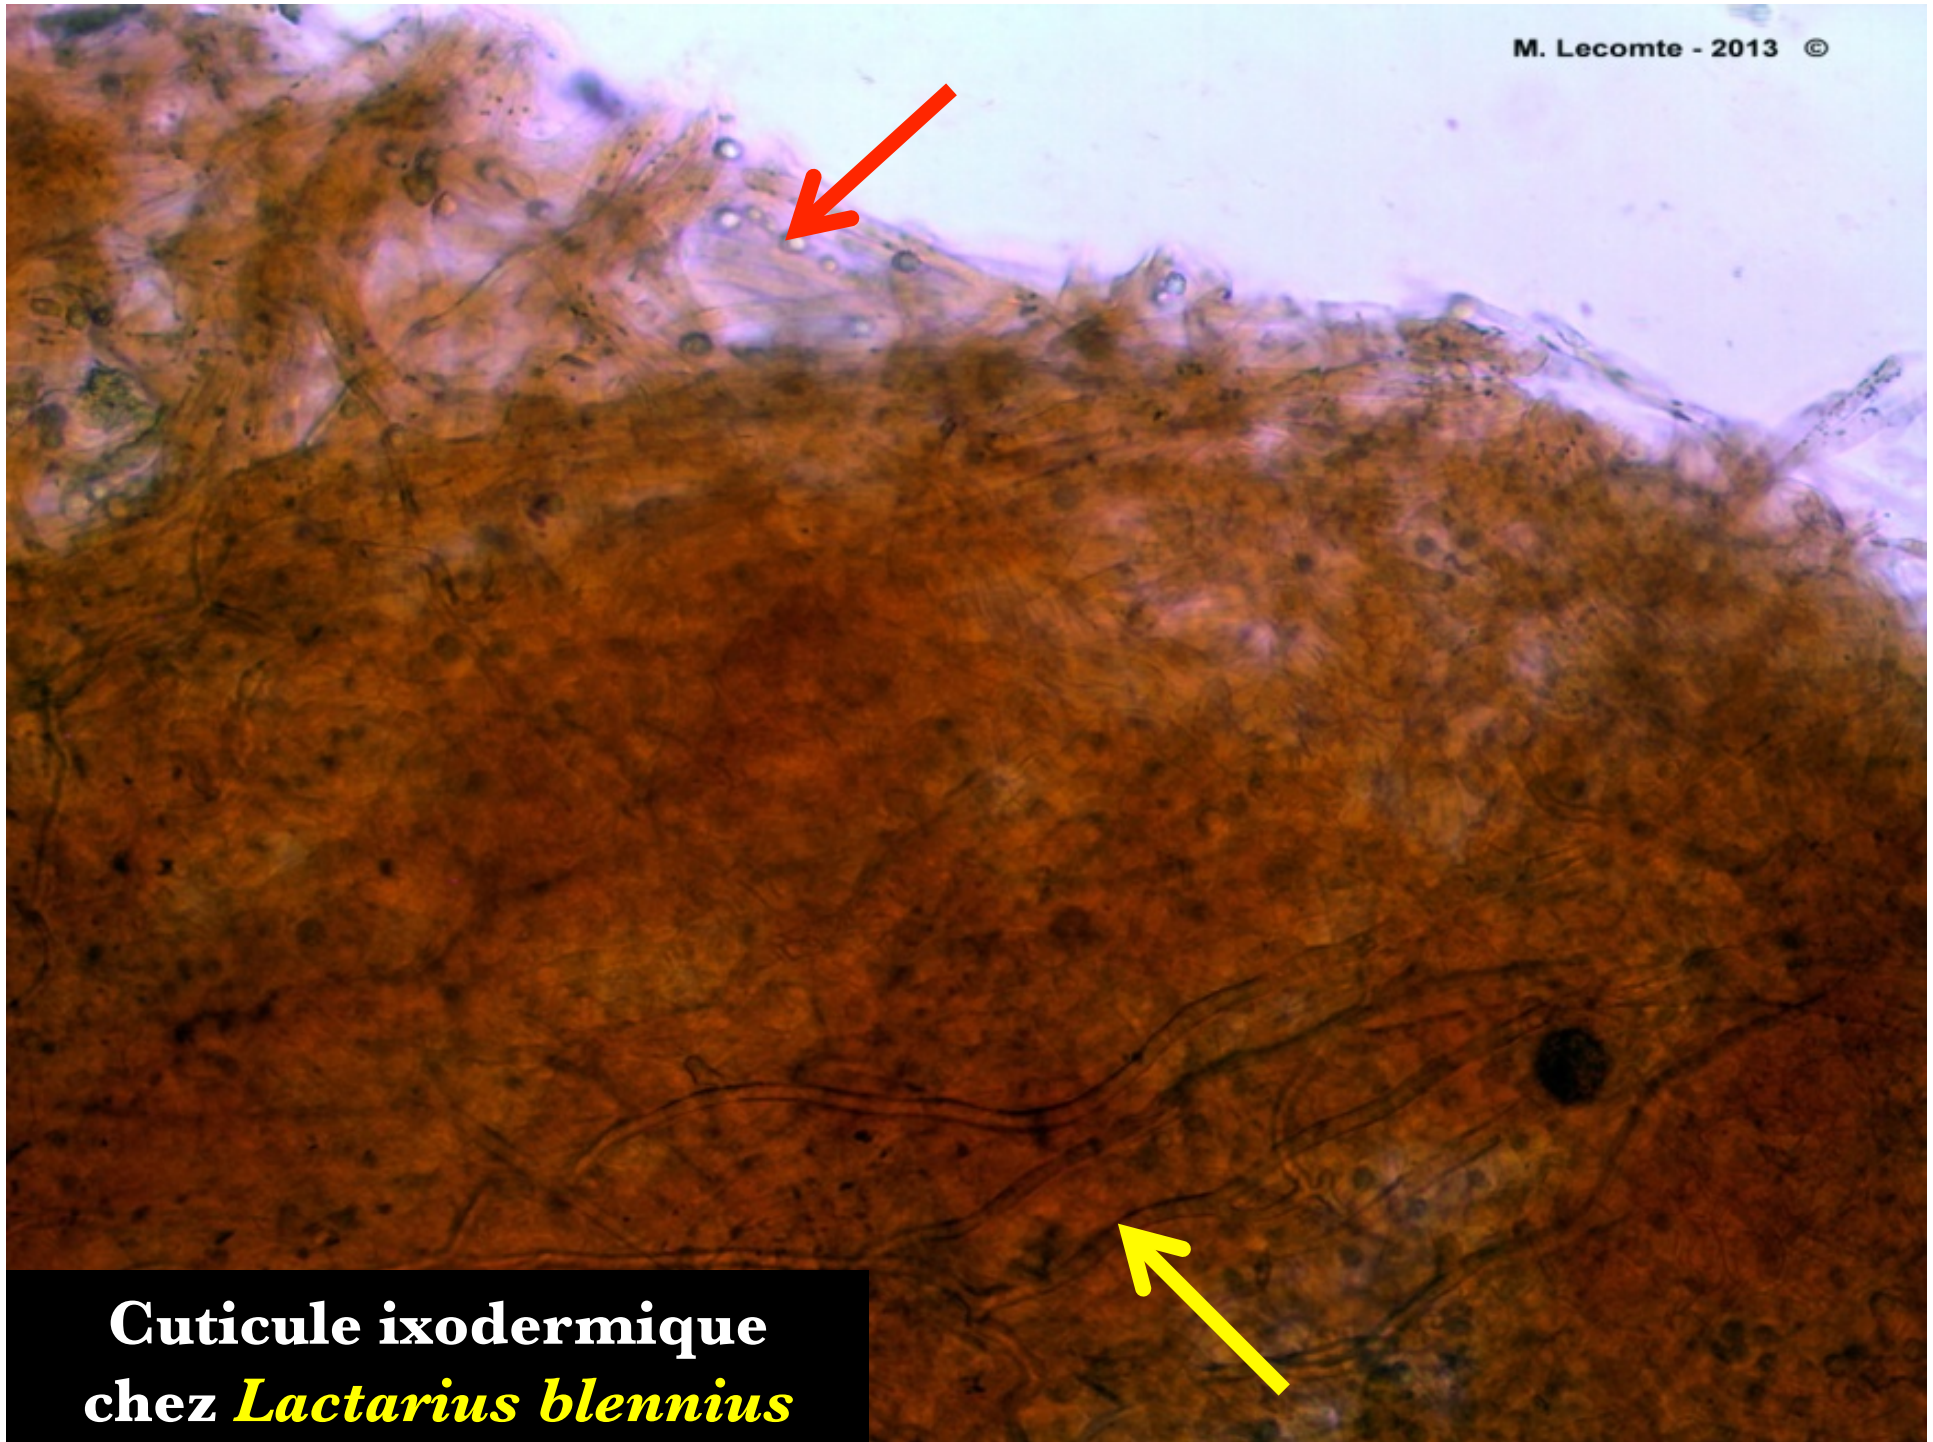

Photo F. Dechany - ©

Cuticule hyméniforme chez *Oudemansiella radicata*

F. Draye - 2014 ©

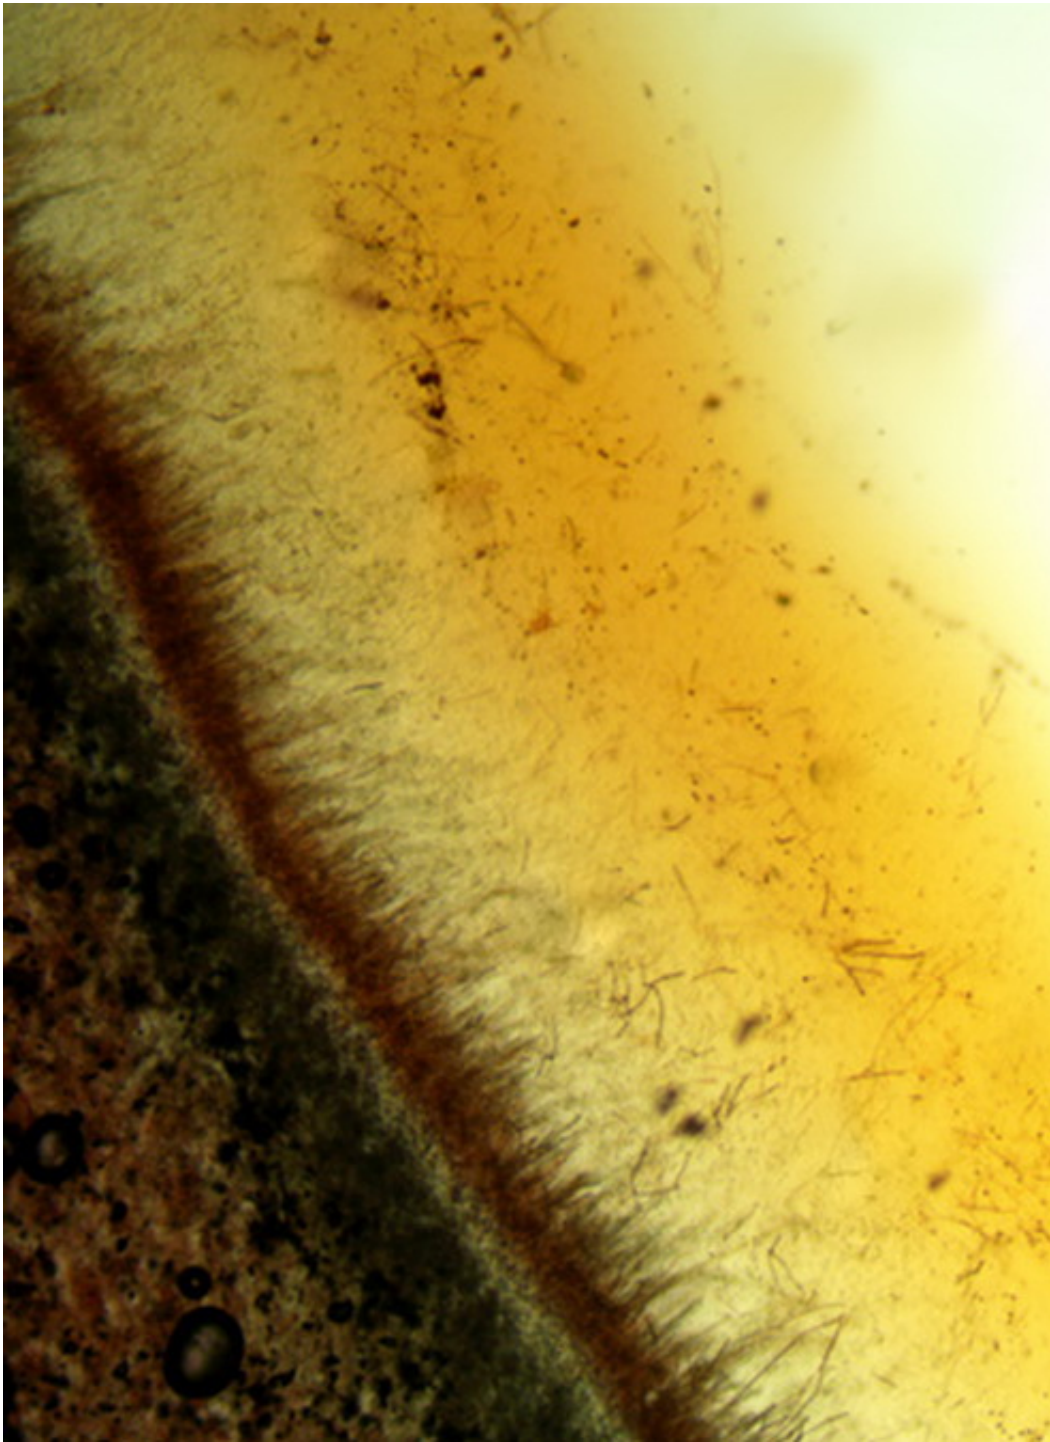

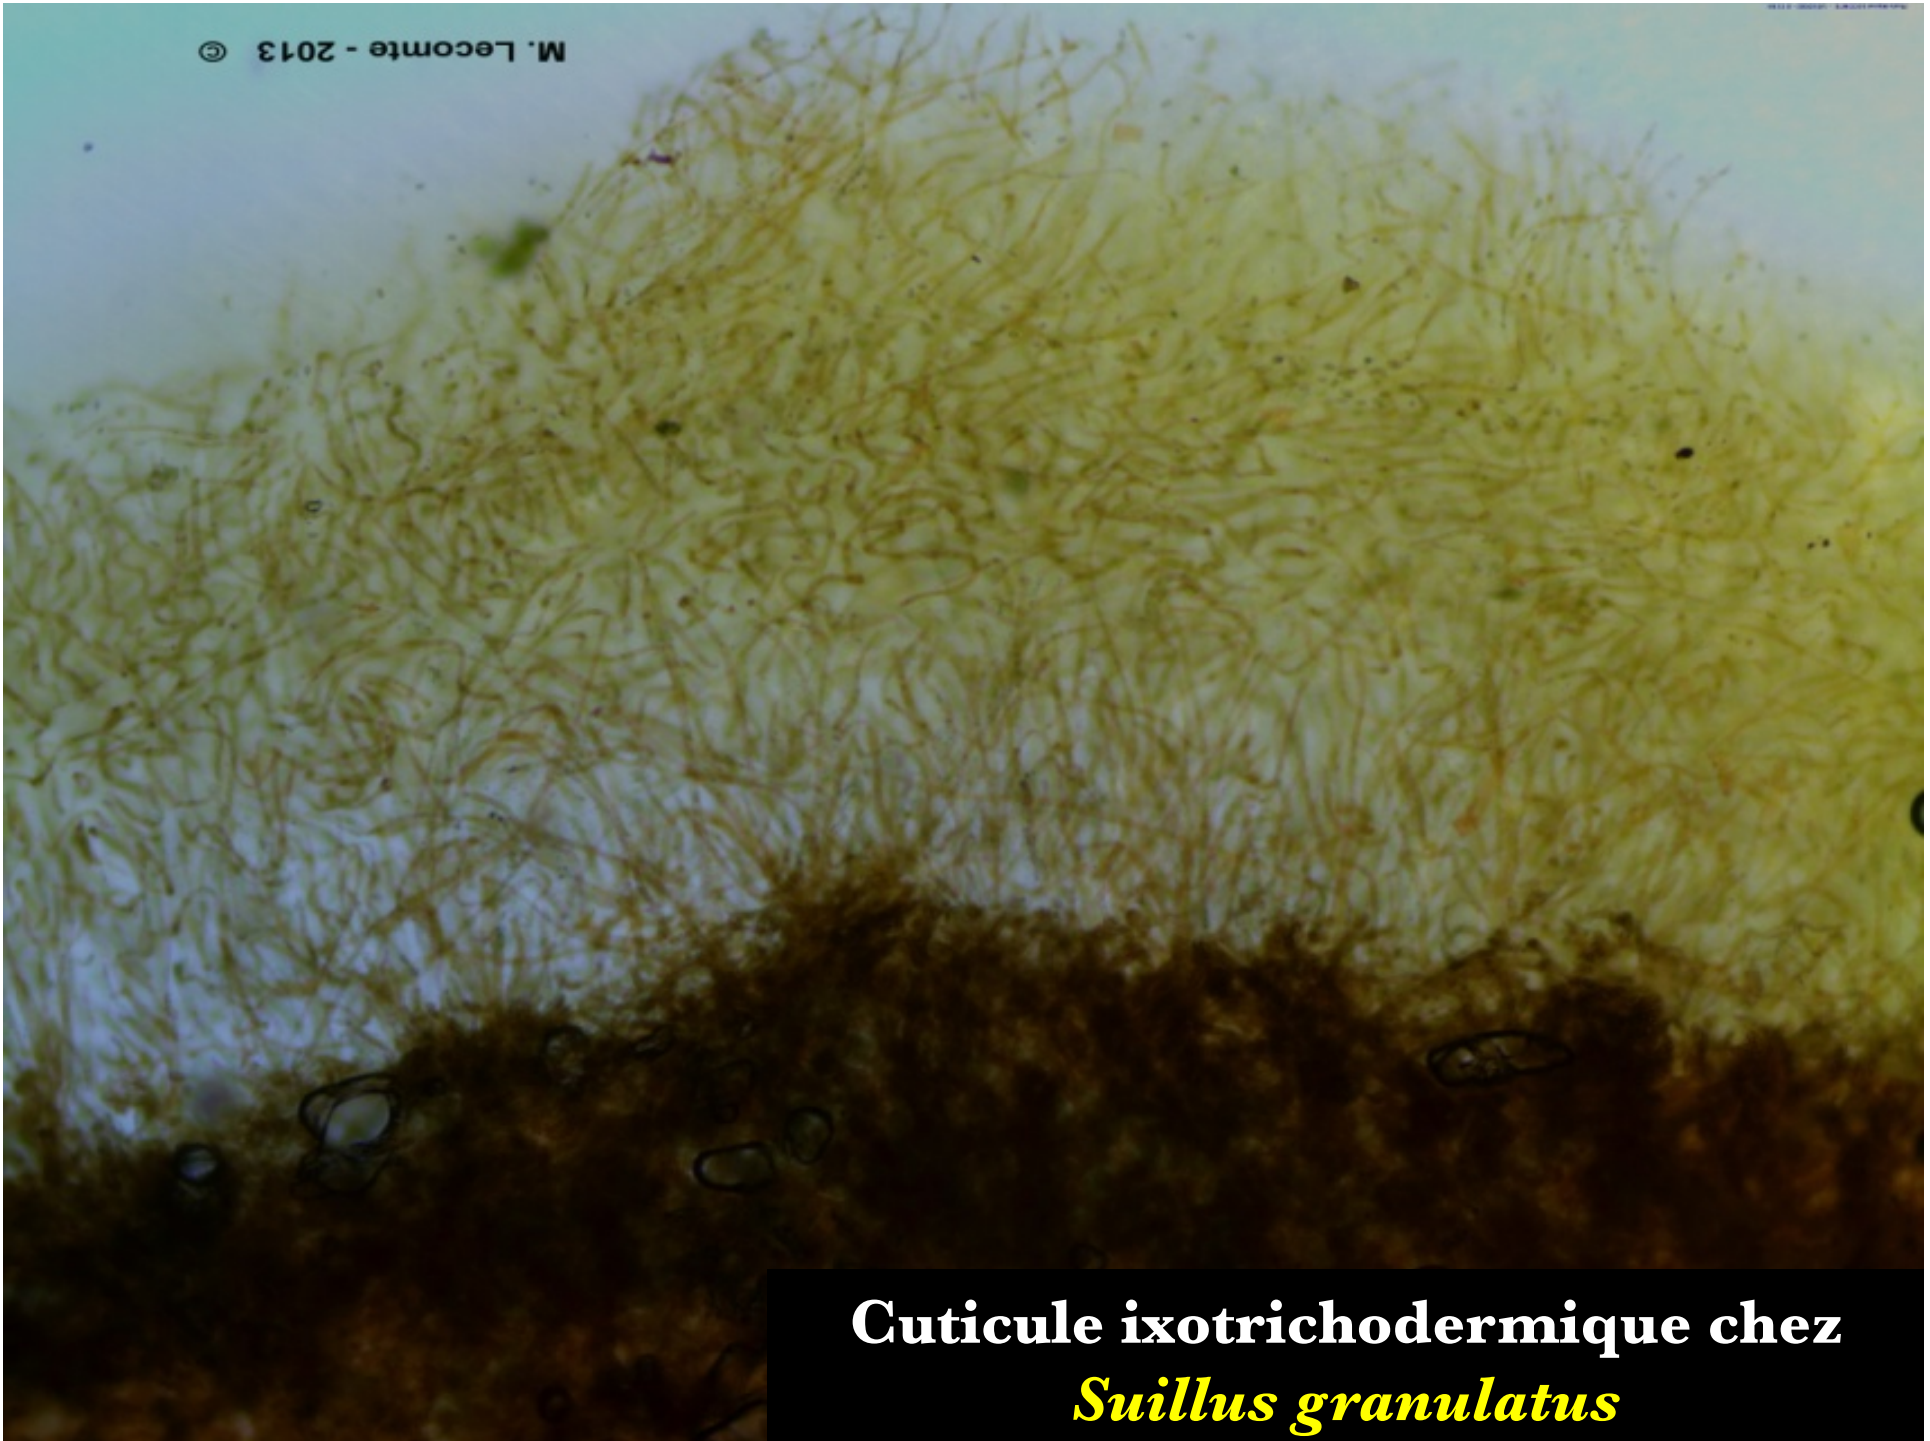

Cuticule ixodermique
chez *Lactarius blennius*

Hygrophorus dicoxanthus

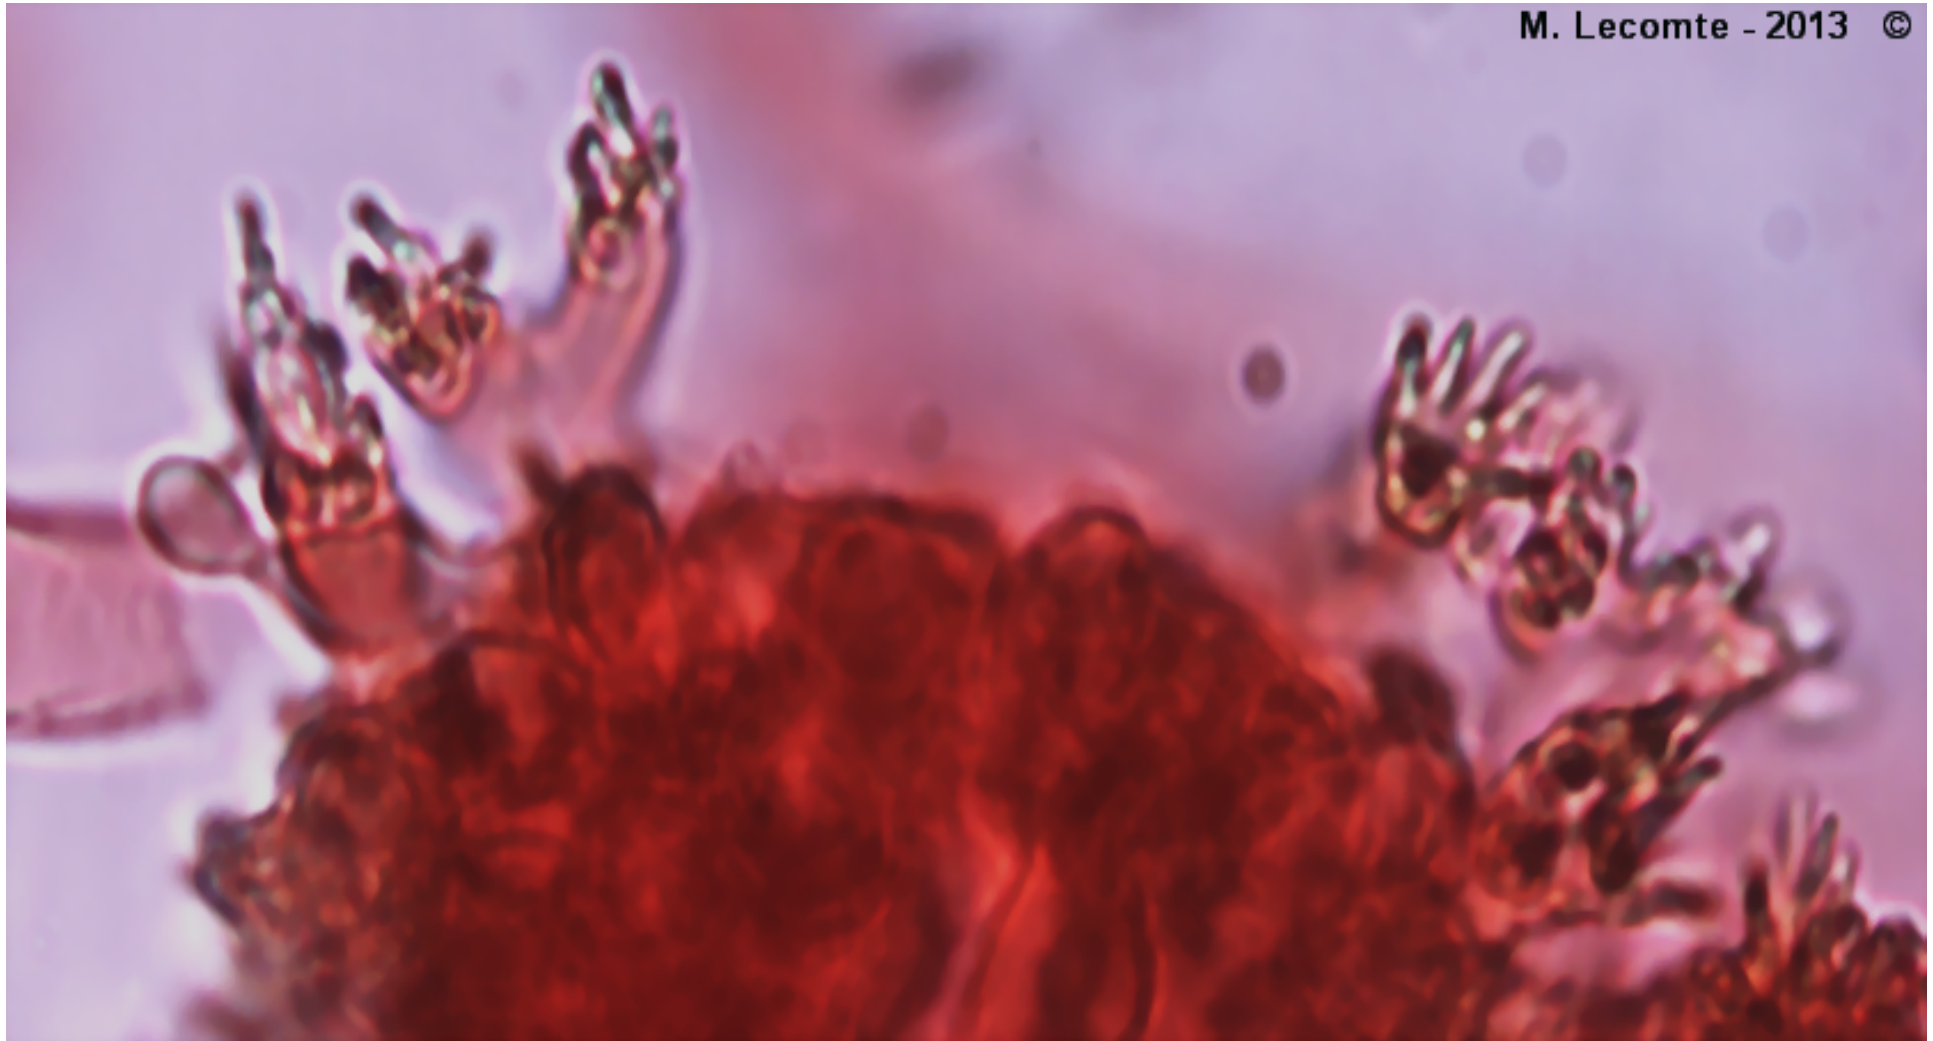

**Cuticule
ixotrichodermique**

Cuticule ixotrichodermique chez
Suillus granulatus

Cuticule ixotrichodermique chez
S. granulatus en DIC

**Cuticule trichodermique chez
Marasmius cohaerens, avec cellules
en brosse, diverticulées**
